

About Us

Precision Equipment Mfg. manufactures various quality trailers for customers all over the country and internationally. Our goal is to be your trailer supplier.

The roll off trailers, manufactured for the truss industry, offer many sizes to fit your needs. Choose from our standard series in 40', 48', and 53' versions, or our stretch trailers which come in 36'-51', 42-60', 46'-64', 50'-70', 53'-73' & 53'-80 foot lengths. We also manufacture gooseneck roll offs that come in 28', 32', and 36' lengths.

For agricultural markets, we supply the 'Dakota' Hopper Bottom, Dakota 41' triple hopper Seed/Fertilizer Tender, and the 'Sheyenne' Uni-Body End Dump. The light weight Dakota hopper has conveniences such as, Shur-Co roll off tarp, hopper view windows, LED lighting system, heavy-duty sealed wiring harness, chip guard lined hoppers and landing gear, removable rock guards, front and rear ladders, 25" ground clearance, along with various other options to choose from. The new versatile Uni-Body End Dump design, 'The Sheyenne' comes with an E-Z off roll tarp, 5 stage cylinder for maximum dump angle, no mud hang up underbody (no outer crossmembers), Heavy Duty 3/16" Grade 50 floor and long sills and combination swing out gate system for grain and / or beet hauling.

Newly introduced for the aggregate market, is the Belly Dump by Precision. This model features 40'-46' length, any axle configuration, rear axle lifts and 20 ton capacity.

Precision Equipment Manufacturing specializes in custom work. If you have a special need, we can build it. We can build your prototype as well as production run quantities of 1-1,000. We supply our own logistics and paint facility, which helps us expedite your products. We carry in house engineers who can create your product to your likings.

Whatever the material, be assured Precision Equipment Manufacturing has the ability to build it for you. We want to earn your business!
